2014-03
(ASNs for everybody)

Job Snijders

Saku Ytti

Purpose

- Remove requirement to be multi-homed in order to get an ASN
- Align policy with reality

Based on feedback

- If you want 16-bit ASN -> must multi-home

- If you want 32-bit ASN -> no MH req

- To discourage excessive resource consumption, the sum of ASNs assigned to a single organization may not exceed 1000.

- A new AS Number is only assigned when the End User has a need that cannot be satisfied with an existing AS Number. RIPE NCC will record, but not evaluate this need.

Status

- Current: Impact Analysis
- Next: review phase
